Profile

Enthusiastic and dedicated IT undergraduate with hands-on experience in full-stack development using React.js, Node.js, and Express.js. Passionate about writing clean, testable code, containerizing applications with Docker, and applying DevOps principles to real-world software projects. Strong problem-solving and communication skills with a continuous learning mindset. Eager to grow in a collaborative, high-performance environment while adhering to secure coding practices and industry standards.

Professional Experience

Software Engineer Intern

03/2025 – 09/2025 | Remote

AryaLabs

- Assisted in the development of a web application, contributing to over 80% of its core functionality.
- Improved application performance by optimizing SQL queries.
- Participated in weekly team meetings, providing valuable insights and suggestions for product enhancements.
- Developed and maintained software documentation, ensuring ease of use for end-users.
- Delivered presentations on the latest frontend development frameworks, leading to the adoption of one for future projects.

Projects

vProfile Multi-Tier Web Architecture 2026

2026

Java, Spring, MySQL, Nginx, Bash Scripting, Vagrant

Executed a manual end-to-end setup of a 5-tier stack (Nginx, Tomcat, RabbitMQ, Memcached, MySQL) to master infrastructure dependencies, followed by developing Bash scripts that automated the entire provisioning process, reducing deployment time by over 80%.

Airdrop Logistics Web Platform(Individual)

2026

Next.js, React, Node.js, MongoDB Atlas, Google Cloud
(Cloud Run, Cloud Storage)

Architected a highly scalable Next.js logistics platform deployed on Google Cloud Run. Engineered a secure, optimized video streaming architecture on Google Cloud Storage. Developed dynamic UI components and caching strategies using MongoDB Atlas for the careers portal. Built a custom admin dashboard to centrally manage a driver forum, user contacts, and platform data. Streamlined the development workflow by implementing Docker containerization and automating deployments using GitHub Actions.

CoLive Web Application (Group)

2024

Angular, Node.js, MongoDB, Python

Developed a full-stack web application using Angular, Node and Python to match users with compatible roommates based on preferences. Implemented dynamic forms for easy user interaction and optimized database queries for faster results.

Contribution - Developed several frontend and backend pages using Angular and trained the AI model for the preference-matching algorithm.

Restaurant Website(Individual)

2025

React JS, Node.js, MongoDB, Express.js

Developed a fully functional restaurant website from scratch using React for the front-end, Express for the back-end, and MongoDB for the database.

Skills

Programming Languages — Java, JavaScript, TypeScript, Python

Frameworks and libraries — Next.js, ReactJS, Express.js, Tailwind CSS

Databases — MySQL, MongoDB

Technologies and Tools — AWS, Docker, Kubernetes, Linux, Git, CI/CD (GitHub Actions), Postman, Trello, Visual Studio Code, Figma, IntelliJ IDEA, AI prompting , AI automation

Soft Skills — Teamworking, Self-Learning Ability, Problem-Solving, Communication, Critical Thinking, Leadership

Education

B.Sc. (Hons) in Computing and Information Systems

2022 – 2026

Sabaragamuwa University of Sri Lanka

G.C.E Advanced Level - Physical science stream

2020

St.Thomas College,Matara

Certificates

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate, Oracle 
- AWS Cloud Practitioner Essentials, AWS
- Postman API Fundamentals Student Expert, Postman 
- HTML, CSS, and Javascript for Web Developers, Coursera 

Extra Curricular Activities

PearlHack 3.0, Web Team Member

2025

IEEE WIE Student Branch Affinity Group of SUSL

Active member of Computer Society

Active member of IEEE Student Branch of SUSL
